| Criteria            | 14 points<br>Exemplary                                                                                                                                        | 10 points<br>Satisfactory                                                                                                                                      | 6 points<br>Needs Improvement                                                                                                                                   | 2 points<br>Unsatisfactory                                                                                                                     | Total Points |
|---------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| <b>Relations</b>    | Relation schemas capture all entity sets and relationships from the team's E-R diagram.                                                                       | Relation schemas capture most entity sets and relationships from the team's E-R diagram.                                                                       | Relation schemas capture some entity sets and relationships.                                                                                                    | Relation schemas capture few, if any, entity sets and relationships from the team's E-R diagram.                                               | <b>14</b>    |
| <b>Attributes</b>   | Relation schemas include all attributes from the team's E-R diagram and all additional attributes necessary to represent any relationships from that diagram. | Relation schemas include most attributes from the team's E-R diagram and all additional attributes necessary to represent any relationships from that diagram. | Relation schemas include some attributes from the team's E-R diagram and most additional attributes necessary to represent any relationships from that diagram. | Relation schemas include few, if any, attributes from the team's E-R diagram. No attributes necessary to represent relationships are included. | <b>14</b>    |
| <b>Primary Keys</b> | Diagram indicates a primary key for every relation. All primary keys are clearly unique, or explanations are offered for their uniqueness.                    | Diagram indicates a primary key for most relations. Most primary keys are clearly unique, or explanations are offered for their uniqueness.                    | Diagram indicates a primary key for some relations. Some primary keys are clearly unique.                                                                       | Diagram fails to indicate primary keys.                                                                                                        | <b>14</b>    |
| <b>Foreign Keys</b> | Diagram indicates all foreign keys and shows the tables that they reference.                                                                                  | Diagram indicates most foreign keys and shows the tables that they reference.                                                                                  | Diagram indicates some foreign keys and shows the tables that they reference.                                                                                   | Diagram does not indicate foreign keys.                                                                                                        | <b>14</b>    |

|                    |                                            |                                             |                                             |                                                |           |
|--------------------|--------------------------------------------|---------------------------------------------|---------------------------------------------|------------------------------------------------|-----------|
| <b>Optionality</b> | Diagram indicates all optional attributes. | Diagram indicates most optional attributes. | Diagram indicates some optional attributes. | Diagram fails to indicate optional attributes. | <b>14</b> |
