

M3: Creating and Populating Zagi Database

Criteria	14 points Exemplary	10 points Needs Improvement	6 points Unsatisfactory	Total Points
Tables	Database captures all the tables and/or columns depicted in the RS. All data types are correct.	Database captures some of the tables and/or columns depicted in the RS. Most data types are correct.	Database captures few, if any, of the tables and/or columns depicted in the RS. Most data types are incorrect.	14
Criteria	6 points Exemplary	3.5 points Needs Improvement	1.25 points Unsatisfactory	Total Points
Primary Keys	Each table has the correct primary key assigned.	Most tables have the correct primary key assigned.	Few, if any, of the primary keys are assigned.	6
Foreign Keys	Database has all foreign keys assigned and they reference the correct tables.	Database has most foreign keys assigned and they reference the correct tables.	Database does not have foreign keys assigned.	6
Data	Correct data was uploaded.	Most of the data was uploaded correctly.	Data was not uploaded correctly.	6
Criteria	3 points Exemplary	2 points Needs Improvement	1 point Unsatisfactory	Total Points

First Query	The query generates interesting information.	The query generates somewhat interesting information.	The query does not run or is trivial.	3
Second Query	The query generates interesting information.	The query generates somewhat interesting information.	The query does not run or is trivial.	3
Third Query	The query generates interesting information.	The query generates somewhat interesting information.	The query does not run or is trivial.	3
Fourth Query	The query generates interesting information.	The query generates somewhat interesting information.	The query does not run or is trivial.	3
Fifth Query	The query generates interesting information.	The query generates somewhat interesting information.	The query does not run or is trivial.	3
Sixth Query	The query generates interesting information.	The query generates somewhat interesting information.	The query does not run or is trivial.	3
