

M7: Medicare Claims Data

Criteria	10 points Exemplary	7 points Needs Improvement	3 points Unsatisfactory	Total Points
Task 1	All fields are relabeled with the correct data type and there was a sensible approach to convert all Total_Account fields and date fields.	Most fields are relabeled with the correct data type, and there was a sensible approach to convert most Total_Account fields and date fields. These tasks were completed with some minor exceptions.	Few, if any, of the fields are relabeled with the correct data type and only a few Total_Account fields and date fields were converted.	10
Task 2	Patient age and length of stay were accurately calculated. All missing values were filled in for age. All three ICD fields were correctly used to add long descriptions to the dataset. All unnecessary columns were dropped.	Patient age and length of stay were mostly calculated. Most missing values were filled in for age. Most of the ICD fields were correctly used to add long descriptions to the dataset. Most of the unnecessary columns were dropped.	Patient age and length of stay were not accurately calculated. Few, if any, of the missing values were filled in for age. Few, if any, of the ICD fields were correctly used to add long descriptions to the dataset. Few, if any, of the unnecessary columns were dropped.	10
Task 3	Readmissions, Readmit Delta, and R30 were all correctly calculated.	Readmissions, Readmit Delta, and R30 were, for the most part, correctly calculated.	Readmissions, Readmit Delta, and R30 were not correctly calculated.	10
Task 4	Patient and hospital list were correctly created and sorted by patient last name/hospital name. Age bins were correctly created. List of Admin ICD Diagnosis	Patient and hospital list were, for the most part, correctly created and sorted by patient last name/hospital name. Age bins were mostly created correctly.	Patient and hospital list were not created correctly or sorted by patient last name/hospital name. Age bins may not have been created correctly. List of Admin	10

	Description was correctly created.	List of Admin ICD Diagnosis Description was mostly created correctly.	ICD Diagnosis Description may not have been created correctly.	
Task 5	Summary data was created correctly.	Summary data was mostly created correctly.	Summary data, for the most part, was not created correctly.	10
