

Case Study – Module 6

Criteria	Excellent 15 to >13.0 pts	Good 13 to >11.0 pts	Fair 11 to >9.0 pts	Below Expectations 9 to >0 pts
Selection of Cloud-Based Accounting Information System	Analyzes available options thoroughly and provides a clear and well-supported recommendation for Pia. Provides detailed and insightful rationale for the selected system.	Analyzes available options and provides a clear recommendation for Pia. Provides reasonable rationale for the selected system.	Analyzes available options and provides a recommendation for Pia, but rationale is limited or unclear.	Does not effectively analyze available options or provide a clear recommendation for Pia.
Risk Management	Identifies and explains all major risks associated with cloud-based accounting information systems and provides detailed and well-supported mitigation strategies. Effectively addresses the specific risks mentioned in the case.	Identifies and explains most major risks associated with cloud-based accounting information systems and provides reasonable mitigation strategies. Addresses the specific risks mentioned in the case.	Identifies and explains some major risks associated with cloud-based accounting information systems and provides limited mitigation strategies. Addresses some of the specific risks mentioned in the case.	Does not effectively identify major risks associated with cloud-based accounting information systems or provide effective mitigation strategies. Fails to address the specific risks mentioned in the case.
Pricing and Transaction Costs	Analyzes pricing and transaction costs thoroughly and provides a well-supported evaluation of the importance of price and transaction costs in Pia's decision-making process.	Analyzes pricing and transaction costs and provides a reasonable evaluation of the importance of price and transaction costs in Pia's decision-making process.	Analyzes pricing and transaction costs but evaluation of the importance of price and transaction costs in Pia's decision-making process is limited or unclear.	Does not effectively analyze pricing and transaction costs or evaluate the importance of price and transaction costs in Pia's decision-making process.

Work Division and Outsourcing	Analyzes accounting tasks thoroughly and provides a well-supported recommendation for the optimal division of work between Pia and the accountant. Evaluates the suitability of each accounting task for outsourcing in the cloud context. Provides insightful discussion of the implications of the choices.	Analyzes accounting tasks and provides a reasonable recommendation for the optimal division of work between Pia and the accountant. Evaluates the suitability of most accounting tasks for outsourcing in the cloud context. Provides some discussion of the implications of the choices.	Analyzes accounting tasks and provides a recommendation for the optimal division of work between Pia and the accountant, but evaluation of the suitability of accounting tasks for outsourcing in the cloud context is limited or unclear. Provides limited discussion of the implications of the choices.	Does not effectively analyze accounting tasks or provide a clear recommendation for the optimal division of work between Pia and the accountant. Fails to evaluate the suitability of accounting tasks for outsourcing in the cloud context.
Fit between the Selected System and Work Arrangement	Provides a well-supported discussion of how to ensure a good fit between the selected system and the work arrangement. Identifies specific factors that need to be considered and provides insightful analysis of their importance.	Provides a reasonable discussion of how to ensure a good fit between the selected system and the work arrangement. Identifies some factors that need to be considered and provides some analysis of their importance.	Provides a discussion of how to ensure a good fit between the selected system and the work arrangement, but analysis of specific factors is limited or unclear.	Does not effectively provide a discussion of how to ensure a good fit between the selected system and the work arrangement.
Long Term Strategy	Provides insightful analysis of the long-term implications of the choices made regarding the cloud-based accounting information system, including potential risks and opportunities. Offers well-supported recommendations for long-term strategy.	Provides reasonable analysis of the long-term implications of the choices made regarding the cloud-based accounting information system, including potential risks and opportunities. Offers recommendations for long-term strategy.	Provides some analysis of the long-term implications of the choices made regarding the cloud-based accounting information system, but may not fully consider all potential risks and opportunities. Offers some recommendations for long-term strategy.	Does not effectively analyze the long-term implications of the choices made regarding the cloud-based accounting information system or provide recommendations for long-term strategy.

Criteria	Excellent 10 to >9.0 pts	Good 9 to >8.0 pts	Fair 8 to >7.0 pts	Below Expectations 7 to >0 pts
Grammar, Mechanics and Clarity	Ideas are well-organized, and responses are clear and easy to follow. Responses are free of grammatical, spelling, and punctuation errors. The language is clear and precise, and there is a consistent use of proper grammar and punctuation throughout.	Ideas are generally well-organized, and responses are clear and mostly easy to follow. Responses contain few grammatical, spelling, and punctuation errors. The language is generally clear and precise, and there is mostly consistent use of proper grammar and punctuation.	Ideas are somewhat disorganized, and responses are somewhat unclear and difficult to follow at times. Responses contain some grammatical, spelling, and punctuation errors that may be distracting to the reader. The language is somewhat unclear at times, and there may be some issues with proper grammar and punctuation.	Ideas are poorly organized, and responses are unclear and difficult to follow. Responses contain significant grammatical, spelling, and punctuation errors that are distracting to the reader. The language is unclear and imprecise, and there are significant issues with proper grammar and punctuation.
